The objections of Atheists and Orientalists to the Holy Quran and their answers...

Abu Hayyan Saeed

First we read the Humorous Objections of Atheists and Orientalists about the Quran E Kareem and after that the Comments section of mine.

“

The blessings of heaven and their reality.

There are hundreds of verses related to heaven in the Quran.

What kind of paradise is being drawn?

The Arabian region of 1400 years ago was a barren, desolate and rocky region with scarce vegetation and water. That's why the Arabs were lured and they were shown a dream of gardens and canals in Paradise, the Arabs loved gardens, that's why they were lured to the gardens.

Therefore, as a psychological tactic, the Arabs were lured with canals of milk in heaven, besides, the Arab desert people took honey from the bushes and ate it with passion, so honey canals were also made in heaven because of their choice. .

Arab men liked to have a large number of women, so for that reason, the religion makers, seeing the greed of these Arabs, also created the greed of more women and concubines in Paradise.

It is interesting that if this was the word of God, then God would have clearly explained the details of Paradise once and for all. An irrefutable and clear text. , like peddlers making the same call over and over again to sell their goods.

In the Qur'an, these gardens are mentioned about 90 times in different verses and canals of Milk and Honey about 40 times. The God of the Qur'an keeps saying the same thing over and over again.

"You will enter Gardens of Paradise under which rivers flow"

This line comes so many times that one either laughs or feels bored after reading it again and again.

In ancient times, sitting on the throne with a carpet and pillows was a sign of wealth.

This was also a big dream of the poor Arabs, so they were greedily told that the people of paradise will be sitting on thrones with cushions, on which there will be golden cushions.

(Quran 18/31 - 38/51 - 43/34 - 52/20 - 55/54 - 55/76 - 56/16 - 76/13)

It was a big dream for the poor people of Arabia to wear silk clothes, to wear gold and silver ornaments.

So those who made the religion clothed the people in heaven in silk clothes, gold bracelets and jewels.

(Quran 18/31 - 22/23 - 35/33 - 44/53 - 76/12 - 76/21)

Arab men were fond of alcohol, but Islam banned alcohol, although rivers of alcohol flowed in heaven.

(Quran 47/15 - 37/45 - 52/23 - 56/18 - 76/15 - 76/16 - 76/17 - 76/21 - 83/25 - 83/27)

The creators of the religion, seeing the attraction of Arab men towards women, allowed them to have more wives and countless concubines in this world, so that men in the temptation of sex would quickly accept this Arab Islam and the same with more women. The temptation to have sex was arranged, arranged in heaven, 72 virgins were arranged in heaven, whose eyes will be big and their chest will be raised. Besides this, slaves are also provided in the form of beautiful boys. Will be done.

Or perhaps minor boys were arranged in Paradise for homosexual Mullahs who will be like pearls who will not live long.

(Quran 4/57 - 55/56 - 55/74 - 55/72 - 56/22 - 52/24 - 76/19 -

The Arab people of that time knew things like gold, silver, pearls, rubies, corals

All these things were made by the Arabs, Allah also knew, so those who built Paradise in the name of Allah kept these things in Paradise, the Arabs did not know about diamonds, that's why there is no mention of diamonds in Paradise.

1400 years ago in the Arab region, the people there only knew about a few fruits like grapes, figs, pomegranates, olives and dates. which were found in Arab regions. In the same way, there were two types of certain fruits in the Arab regions, so it was promised in the Holy Quran that two types of fruits will be given in Paradise.

Although there are over a hundred species of fruits worldwide, there are dozens of varieties of each fruit. There are over 500 varieties of mangoes alone.

So, in fact, the fruits that Prophet Muhammad himself did not know about, then even the Allah of the Qur'an did not know about these fruits, such as mangoes, bananas, apples, pineapples, coconuts, peaches, apricots, Although the God of Hinduism likes coconuts. Because coconut is abundant in this area.

Allah repeatedly says in the Qur'an that there are many signs in this Qur'an for those who understand, so I also say that there are indeed many signs in the Qur'an that show that the Qur'an is a self-made word of the Arabs.

So, people

Get out of the fake heaven-hell dreams.

The greed of heaven or the fear of hell are just strategies to control people and keep them on the right path.

This life is not a test or any test, it is the first and last chance for all living beings including human beings. let live

Our good deeds make our mind, our feelings heaven, our bad deeds make our mind, our sense of conscience hell. These feelings are both heaven and hell.

We live in the heaven or hell of this feeling all our lives. After that it's all over.

”

Only our good deeds and good thoughts survive.

Comments : Abu Hayyan Saeed

Ecology is the science of the relationship between organisms and their environment. Human Ecology is about the relationship between people and their environment.

In Pakistan, if we talk about Mediterranean and European region fruits like Avocado, Nectarines, Pieria Kiwi, Blueberries etc. then no one can estimate the taste, aroma and pleasure of these fruits. Majority of Pakistanis do not eat these fruits as they are not local fruits of Pakistan.

If I am addressing a small gathering of 40-50 people from the hot desert and mountainous region of Arabia and telling them about the taste, aroma and deliciousness of Evacado, Blueberries, I think they think I am a fool. will understand and I deserve it.

The message of the Qur'an was given to the Arabs by the Holy Prophet, so the examples of figs, dates, grapes, honey, milk, pomegranates, and olives are described in the Holy Qur'an. Because the Arabs were familiar with these foods and these things have great importance in the Arab society. The Arabs of that time did not know

about mango, banana, apple, pineapple, coconut, peach, apricot, so the Quran did not mention these fruits.

The same fruit will be found in Paradise which was found in Arab regions. Who Said It .. Grapes Figs Pomegranates Olives and Dates These fruits have been readily available all over the world for centuries.

Is the Quran the self-made words of the Arabs?
Well, we need some answers,

Tell us the names of the Arabs who made the Quran?

And what was the detailed bio data of these smart Arab people?

How many Arabs did this holy work?

What were the occupations of these Arab people?

Did they disappear after this important work?

Did they come from the skies or did they arise from the agricultural land like plants and trees?

The concept of 72 hoors has never been described in the Qur'an!

Were only Arabs interested in women?

It is known that the men of other nations (Jews, Christians, Khorasani, Iranians, Africans, Indians, Romans, etc.) were unmanly at that time and had no interest in women?

I believe If there were swimming pools or massage parlors in Arab society, the wonderful swimming pools and massage parlors of Paradise would have been introduced in the Qur'an.

If a child has never seen an elephant and his father tells him that if he gets first position in his exam, he will get an elephant as a gift! What will happen? Because the child has never seen an elephant! but if his father had offered him a new bicycle, he would have tried to prove that he was worthy of the new bicycle. Similarly, the Qur'an presents concepts that people knew well but not the strange ideas.

That is why the Qur'an refers to the system available to the common man in Paradise which the common man knew well but never enjoyed. Because the richest people in Arab society enjoyed it.

Does the atheist gang or the Orientalist gang consider all human beings as very simple and innocent creatures, that they should feel fear of divine revelation?
